OBJECTIVES AND METHODS

The U.S. Army Environmental Center (AEC) tasked the Mandatory Center of Expertise for the Curation and Management of Archaeological Collections (MCX) with the job of assisting Army installation personnel in complying with the requirements of the Native American Graves Protection and Repatriation Act (P.L. 101-601, NAGPRA). The MCX was asked to locate and assess archaeological collections derived from Army-owned lands, to identify the federally recognized Native American tribes most likely culturally affiliated with the collections, to draft Section 6 Summary Letters for each installation, and to conduct physical inventories of any collections that contain human skeletal remains. This report conveys the results of the collections research completed to assist Fort Chaffee in complying with the Section 6 Summary requirements of NAGPRA.

The MCX used a two-stage process to identify, locate, and assess the contents of archaeological collections from the installation. First, archival research was performed to review all archaeological site records and reports for the installation. Second, telephone interviews were conducted with personnel at installations, universities, museums, and archaeological contractors that were identified during the archival research as possible repositories of Army collections.

Archival research for Fort Chaffee began with a search of the National Archeological Data Base (NADB) for references pertaining to the installation. This was followed by a thorough examination of all archaeological site forms and a literature review of all pertinent archaeological reports and manuscripts on file at the Arkansas Archeological Survey, Fayetteville, Arkansas. The records search was performed at the Survey in March 1995 and sought to identify any work on the installation that may have produced archaeological collections.

Subsequent telephone interviews to potential collections repositories ascertained whether the materials were present and the range of objects in each collection. Once the collections were located and assessed, MCX personnel identified federally recognized Native American tribes that are likely to be culturally affiliated with the materials in the collections. Draft Section 6 Summary letters are enclosed for each of these tribes (Appendix I), as well as a listing of the current tribal chairpersons (Appendix II).

RESEARCH RESULTS

ARCHAEOLOGICAL INVESTIGATIONS AT FORT CHAFFEE

Archaeological field work began on Fort Chaffee, Arkansas, in 1980, with a survey conducted by Archaeological Research Associates of Tulsa, Oklahoma. Two sites were recorded during this survey, but there is no record of material being collected. Subsequent survey and testing between 1985 and the present identified a total of 895 known archaeological sites on Fort Chaffee. Survey and testing at these sites were conducted by:

Arkansas Archeological Survey, Fayetteville, Arkansas,
Heartfield, Price, and Greene, Inc., Monroe, Louisiana (no longer in business),
Cojeen Archaeological Services, Norman, Oklahoma,
Mid-Continental Research Associates, Springdale, Arkansas, and
Archeological Assessments, Inc., Nashville, Arkansas.

Archeological Assessments, Inc. has conducted the majority of the archaeological work on the Fort. They have recorded 877 of the 895 sites. Many of sites on the Fort have been revisited by other contractors. The Arkansas Archeological Survey investigated eight sites, Heartfield, Price, and Green investigated three, Cojeen Archaeological Services investigated 20, and Mid-Continental Research Associates investigated 37. Artifact collections were made by all contractors, except Archaeological Research Associates and Heartfield, Price, and Greene.

The archaeological sites on Fort Chaffee are both historic and prehistoric. The historic site types include artifact scatters, farmsteads, refuse heaps, structures, and one cemetery. The historic sites yielded five different classes of collected materials: faunal, metal, glass, pottery, and building materials. No material was collected from the historic cemetery. The prehistoric site types include isolated finds, artifact scatters, open campsites, and one structure (rock wall). Materials collected at the prehistoric sites included flaked stone chipping debris, stone tools, pottery fragments, fire-cracked rock, and animal bone. No human skeletal remains were encountered or collected.

SUMMARY OF ARCHAEOLOGICAL COLLECTIONS

A total of approximately 166 ft³ of artifactual materials has been collected from 494 of the 895 sites on Fort Chaffee. As of the date of this report, the material is housed at the following four repositories:

University of Arkansas Museum, Fayetteville, Arkansas,	ca. 140 boxes
Arkansas Archeological Survey, Fayetteville, Arkansas,	ca. 75 objects
Mid-Continental Research Associates, Inc., Springdale, Arkansas,	ca. 5 boxes
Archeological Assessments, Inc., Nashville, Arkansas,	ca 20 boxes.

The attached *Summary of Current Locations of Archaeological Collections from Fort Chaffee* (Appendix III) provides detailed information about each collection derived as a result of archaeological investigations at the installation. A collection consists of all of the materials, artifacts and associated documentation (e.g., field notes, maps, photos, data analyses, correspondence), produced as a result of an archaeological investigation or project at a single site or multiple sites. In some cases, the same archaeological site may have been investigated by various individuals or organizations. Depending on where the resulting collections are curated, they may be stored and identified as separate collections or separate components of a single collection. In cases where the artifacts and records have become separated, we list the records collections repository as well.

Every attempt has been made to locate all collections cited on available archaeological site records or in published and unpublished references to archaeological investigations on the installation. At present, the location of 101 objects collected by Cojeen Archaeological Services at eight sites (3SB427, 533, 536, 540, 545, 987, 990, and 991) has not been ascertained. The material classes of the objects in this collection include prehistoric lithics and historic lithics, ceramics, and glass.

No funerary objects were identified in a thorough a review of the archaeological records, associated literature, and telephone interviews. The final examination of sacred objects or objects of cultural patrimony may be established by the associated Native American tribes (if determined to be culturally affiliated and the objects meet the definitions and restrictions specified in NAGPRA) upon further deliberation.

REFERENCES TO ARCHAEOLOGICAL INVESTIGATIONS

Two sets of references regarding archaeological work conducted on Fort Chaffee are attached: Appendix IV contains the list of references reviewed by the MCX during its archival research, and Appendix V is the list of references contained in the National Archeological Data Base (NADB).

NATIVE AMERICAN TRIBES ASSOCIATED WITH FORT CHAFFEE

The Caddo, Osage, Quapaw, and Choctaw have been identified by various sources as being affiliated with the lands occupied by Fort Chaffee. Five site records (3SB189, 190, 212, 215, 692, 635) indicate the presence of cultural materials that are Caddoan or possibly Caddoan. The report by Santeford (1994) indicates that some of the material collected by Mid-Continental Research Associates may be Caddoan. Sabo (1991) indicates Caddo and Osage occupancy on land that is now Fort Chaffee. Ms. Hester Davis, Arkansas State Archeologist, stated in a telephone conversation (27 June 1995) that both the Caddo and Osage may have cultural affiliation with material from the Fort Chaffee area.

Based on the 1978 Indian Land Claims cases, the Caddo were adjudicated aboriginal tribal occupancy on land approximately 150 miles south of Fort Chaffee; the Osage were adjudicated a large area immediately north of the Arkansas River and Fort Chaffee (U.S.G.S. n.d.).

Originally, the land containing Fort Chaffee was part of Quapaw territory, but land area south of the Arkansas was ceded to the United States in 1818. In 1820, part of this land was given to the Choctaw by the United States. In exchange for land further west, the Choctaw receded this land to the United States in 1825 (Peterson and Otter n.d.).

Federally recognized tribes for each of these peoples are listed in Appendix II.

SECTION 6 COMPLIANCE

P.L. 101-601 (NAGPRA) requires that federal agencies engage in active consultation with Native Americans with federally recognized tribes and/or lineal descendants who may be culturally affiliated with the archaeological collections from the installation. Enclosed are a draft NAGPRA Section 6 Summary letter (Appendix I) and a list of the tribal chairpersons from the federally recognized tribes which may be culturally affiliated with the collections (Appendix II). The Caddo, Osage, Quapaw, and Choctaw are federally recognized.

Initial consultation should be conducted on a government-to-government basis. Refer to P.L. 101-601 (NAGPRA) for specifics on required Native American consultation and the legal definitions of items subject to NAGPRA.

APPENDIX I

DRAFT SECTION 6 SUMMARY LETTER FOR FORT CHAFFEE, ARKANSAS

[Installation Header]

[Tribal POC Name]

[Title]

[Address]

[City, State, Zip]

Dear [Name of POC]:

I am writing to inform you of collections held by Fort Chaffee that may contain Native American cultural items, as defined by the Native American Graves Protection and Repatriation Act (NAGPRA), that are, or are likely to be, culturally affiliated with the [Tribe]. Fort Chaffee has documented these archaeological collections in a Summary in accordance with the requirements of Section 6 of NAGPRA.

Fort Chaffee is responsible for collections that include approximately 140 boxes at the University of Arkansas Museum, 75 objects at the Arkansas Archeological Survey of Fayetteville, Arkansas, five boxes at Mid-Continental Research Associates, Inc. of Springdale, Arkansas, and 20 boxes at Archeological Assessments Inc. of Nashville, Arkansas. These archaeological collections were generated from surveys and/or testing conducted from 1980 to the present. The collections consist of prehistoric stone tools, ceramics, animal bones, plant remains, and fire-cracked rock, and historic Euroamerican materials such as glass, ceramics, metal fragments, animal bones, and building material, and associated documentation such as field notes, reports, and correspondences. No human skeletal remains or associated funerary objects were identified in our review of the archaeological collection documentation.

We are notifying [Tribe] because some of these materials were found in, or around, the area thought to be part of the territory occupied or used aboriginally by the [Tribe]. In accordance with Section 6 of NAGPRA, we are inviting you to consult with us regarding these archaeological collections. Upon your written request, we will provide you access to review our records, catalogues, relevant studies, or other pertinent data for the purpose of determining the geographic origin, cultural affiliation, and basic facts surrounding acquisition and accession of these collections.

Please feel free to contact [Installation POC name] regarding any of these issues, at [telephone, address].

To facilitate discussions between Fort Chaffee and the [Tribe] on these matters, please forward the name and method of contacting your tribal representative, traditional religious leader, or preferred NAGPRA point of contact. We look forward to working with you.

Sincerely,

[Commander's signature]

APPENDIX III

SUMMARY OF CURRENT LOCATIONS OF ARCHAEOLOGICAL COLLECTIONS FROM FORT CHAFFEE, ARKANSAS

All collections information has been entered into a Paradox data base file and can be queried by any of the fields listed below, as well as by the name of the installation and by MACOM. The data base will be delivered by the MCX to the U.S. Army Environmental Center upon completion of the U.S. Army NAGPRA Compliance Project. Inquiries for additional information are welcome (MCX: 314-331-8865; U.S. Army Environmental Center NAGPRA Compliance Project: 410-671-1573). The data fields listed in the summary of collections contain the following information:

REPOSITORY:	The current location in which the collection is stored, as of the date of this report.
REPOSITORY POC:	The person contacted by the MCX, or the person to whom inquiries regarding the collection should be addressed.
TELEPHONE:	The telephone number for the repository POC.
COLLECTION ID:	The identifying unit used by the repository to store and/or locate the collection. This can be a unique accession number assigned by the repository, the archaeological site number or project name, the name of the collector of the collection, or another number or name assigned by the repository.
SITE NUMBERS:	The official site number or name only for those sites from which materials were collected. An investigator may have performed work at additional sites but did not collect any materials. Those site numbers are not included in this field.
FIELDWORK DATES:	The date(s) during which the investigation(s) occurred. This information is provided to differentiate between projects that may have investigated the same site repeatedly.

EXCAVATOR/COLLECTOR: The individual and/or organization that conducted the investigation.

COLLECTION SIZE: The volume or number of objects in a collection, estimated by the repository POC or from project reports.

DESCRIPTION OF MATERIALS: General material classes of the objects in the collection derived from data provided on site records, in references, and/or by the Repository POC.

ANTIQUITY/ARCH. PERIOD: Chronological or cultural-historical designations recorded on site records or in references specific to the collection.

CULTURAL AFFILIATION: This column contains only those ethnic identifications found in the site records or references specific to the collection. This field is left blank if no such information was recorded.

BASIS OF DETERMINATION: Documents the source of the cultural affiliation information (e.g., site record, oral testimony, reference).

SECTION 5 MATERIALS: Describes the number and kind of human skeletal remains and associated funerary objects in the collection, as indicated by the site records, references, repository management documents, or information from repository POC. If these materials are present or are suspected to be present, NAGPRA Section 5 requires a physical inventory of the materials.

APPENDIX IV

MCX LIST OF REFERENCES

In addition to the references reviewed by MCX personnel at the archaeological site information center, every attempt was made to obtain references cited but not on file. Information taken from these references was coded for data relating to collections made from sites located on installation property (see attached sample of PD-C Bibliographic Data Sheet form) and entered into a data base for ease of manipulation.

Report titles were drawn directly from the title page of reports, and consist of the following fields:

FIELD	DATA ENTERED
Subject Property	Army Installation name
Last Name	Primary author's last name
First Name	Primary author's first name
Middle Initial	Primary author's middle initial
Secondary Authors	Names of secondary authors, <i>or</i> in instances where the author is a company rather than an individual, the company name is listed here
Title	Title of the reference. For letter reports, the person or agency to whom the correspondence is addressed is listed as the title.
Series	If the report is part of a publication series, the name and number are provided here.
Date	Date of publication or submission
Length	Report length in pages
Contract Number	Contract number and delivery order number, if applicable

The data for the next three fields are drawn directly from the report title page and reflect the hierarchy of contracting agencies involved in accomplishing the work. In some cases, the sponsoring agency is listed as the Army installation; in others, the intermediary contracting agent, (e.g., the Army Corps of Engineers or the National Park Service) is listed as the Sponsoring Agency.

Sponsoring Agency	Agency for which the report was prepared
Contractor	The agent contracted to perform the work
Subcontractor	The agent subcontracted to perform the work

The majority of the citations for archaeological investigations on Army land refer to unpublished reports prepared under contract with federal agencies, consequently the MCX printout was designed to address these reports. In instances where the author is a company rather than an individual, the company name is listed in the Secondary Authors field (due to the length of the field). For published references, the publisher is listed in the Sponsoring Agency field.
